- All activities may be subject to weather conditions and if an activity is cancelled due to weather the provider will attempt to reschedule the activity. In the event that a suitable alternative cannot be arranged the provider will refund all monies paid.

• **OVERVIEW** •

**Gold Coast Water Sport Flyboard
Extreme 30 Minutes Air Time**

What do you get when a jet ski racer decides to fly like a bird and dive like a dolphin? The Fly Board, that's what! The Fly Board has a hose connected to a jet ski to get propulsion through air and water. In reality, it's a diving, flying, power house of pure heart-pounding fun.

Gold Coast Water Sport Flyboard Extreme

30 Minutes Air Time

What You Can Expect From Your Fly Board Experience

You'll begin with a safety/training briefing and the staff will kit you out with a wetsuit, helmet and lifejacket.

From there you will get into the water and your instructor will get you comfortable. It won't be long before you will be up and out of the water!

It is not guaranteed that you will get out of the water BUT they do guarantee you will have a whole lot of fun trying!!

An experienced instructor will take you through the following basic manoeuvres

- Taxiing through the water
- Turning to the left and right around the instructor
- Standing up

The following tips will help you through your first Fly Board experience

- **Falling**
If it is your first time, you will fall into the water before you get the hang of the board. Persistence is key, so communicate with your instructor, keep trying, and you will fly
- **Flying**
Position your feet as if you are standing on the ground, lock your knees and keep your back straight with arms relaxed by your side. You are flight ready! Once you are out of the water, lean on your toes to drive forward and lean on your heels to drive backwards.
- **Turning**
Turn your head toward the direction you wish to go, drop your shoulder and lean on your leg with the opposite leg bent. Students should rotate around the jet ski and keep a safe working distance of 5-7m from the jet ski. If the hose becomes fully extended, you won't gain height.
- **Flying High**
At a safe distance from the jet ski, remain stationary with feet flat. Do not drive forward or turn. Your Fly Board instructor only allows students to fly high if it is safe to do so
- **Diving**
You can learn to dive after you have mastered flying. When you dive, your hands must come up slightly behind your head, and your legs and posture must remain straight. Dive vertically into the water with feet pointing toward the sky. Always dive away from the jet ski and listen carefully to your instructor.
- **Back Dives**
For experienced fly boarders only and should only be attempted under the direction of an instructor. Always dive away from the jet ski. Lean on your heels, bend back, look where you want to go. Dive with a straight posture and feet pointed at the sky.

The Fly Board Experience, Is an Experience Like no Other!

The Fly Board is a singular experience that cannot be duplicated on any other craft and best of all, the friendly, experienced staff are confident they can get most people doing basic manoeuvres in under ten minutes.

• POLICY •
